Comments strange thing is that my Mac version doesnt seem to have 3.11, it has.11 But I'm getting 1.2.1 in Macports too with the 1.2.1 patch, so I don't know what to make of this - maybe it's a different problem poorengelton@gmail.com wrote on Sun, 23 December 2006 10:38 > strangelative wrote on Sun, 23 December 2006 13:28 > > I just had a similar problem with the 1.2.1 patch in MacPorts > > -- and started digging to see if I had a different version of > > automake installed than you, Chris. I don't know how strange that is, but > we report it > as bug #518250. I think I may have installed the MacPorts 1.2.1 for OS X using OS X Sofware Update. The one I have installed seems to have started with the 1.11 beta and includes later versions. This version also has Automake 1.11 but it does not seem to have the same problem. That is the only difference I have with your MacPorts distribution. Would installing the copy on the MacPorts site fix your problem?
